

Self-Test GFCI Receptacle

With Self-Test Function
End-of-Life Monitor

- Residential:
- Bathrooms\ Kitchens\ Basements\ Garages\ Laundry rooms\Wet locations
- Social institution:
- School class rooms\ Laboratories\ Restrooms and Kitchens
- Airports\ Commercial Offices\ Shopping centers
- Restaurants\ Hotels\ Public bathrooms
- Public Areas receptacle which near wet or damp locations.

The Fahint's GFCI Outlet self-test automatically every 15 minutes to ensure reliable protection from shock due to ground fault occurrences. Meeting National Electrical Code requirements for ground fault protection, GFCI protection is required by code in bathrooms, kitchens, garages, basements, outdoor areas, and for any other outlets found within six feet of a sink or water source. GFCI outlets should always be used when replacing existing GFCI outlets during renovation.

Tamper-Resistant

Helps keep children safe.
Helps prevent insertion of foreign objects.
Children insert objects into the socket such as screw driver, knife or copper wire can not make the TR shutter open, unless the plug insert into with both pins.

Self-Protection Function

The GFCI will warning user with yellow led on if Voltage instability, (voltage blew 90V or over 180V) and will cut off the power after 5 minutes if no one handles it, which protect users' household appliances and equipment from damage.

- GFCI shall automatically conduct self-test every 15 minutes to ensure continuous protection.
- Auto-monitoring exceeds the UL requirement UL943 2018 version.
- On initial power up, tests the GFCI within 3 seconds.
- Enhanced Service Life led indicator lamp integrates two-color function: Green/Red.
- Strong anti-interference design.

Self-Grounding Clip

Auto-Grounding Clip assure a positive ground to metal box.

Safty Outlet with TR

Tamper-Resistant shutter system allows easier plug insertion while preventing children from inserting objects by accident.

Reset Button

Reset the GFCI after accurate wiring.

Test Button

Test your GFCI monthly to ensure the GFCI Continuously provide Ground-fault protection.

Led Indicator

Dual Led Indicators inside.
On initial power up, tests the GFCI within 3 seconds.

Captive screws

Make for easier installation.

Zinc-Plated Steel York

1.2mm Zinc-Plated thickness for safty installation.

Green light:
GFCI working properly;
Cyclic testing every 15 minutes.

Red light blinking :
GFCI Self-Testing;

Red light On permanent : GFCI reached its service life and needs to be replaced.

Led Off (No power)
GFCI triped,press RESET button;
Check the power circuit if can not reset.

1. Make sure that terminals screw are not been locked.

2. Insert the wires then lock the screws. Yellow attention sticker sealed the GFCI's Load terminals.

A. Remove the yellow attention sticker before you connect GFCI's Load terminals.

B. Insert the wire to the Load terminals then lock the screws.

Attentions:

- GFCI's Green Led will on if you Reversed wiring with LINE/LOAD. No power to the socket. Which will protect your device and avoid accident.
- Yellow attention sticker sealed the for GFCI's Load terminals only.
- Read the Installation instructions carefully before you start install the GFCI outlet.
- Make sure power supply been shut down before your operation.
- Call an electrician if it is necessary.
- Please use AWG 14 for 15Amp GFCI, and AWG 12 for 20Amp GFCI Outlet.

Prevents Line-load Rversal Miswire:

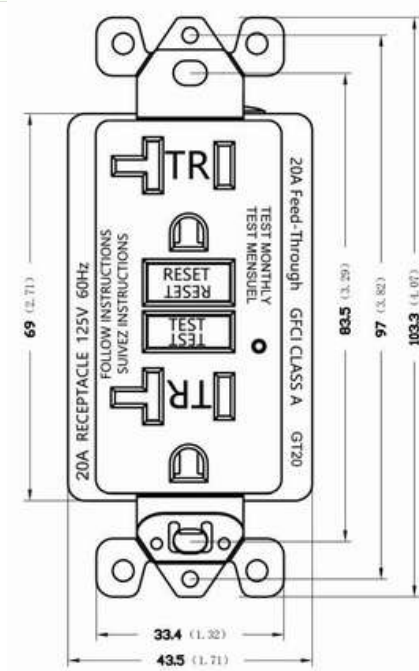

No power to the face outlet or downstream receptacle if wired incorrectly.

Meet latest UL2018 Requirements

Self-Test GFCI conducts an automatic test **every 15 minutes**, to ensure provide safty protection continuously.

USB Charger Receptacle

Convenient and efficient charging
More Safty

Applications

- Residential - Kitchens, bathrooms, garages, basements, laundry rooms, wet sinks and other wet locations around the house
- Educational Facilities - Classrooms, restrooms, laboratories, dormitories and kitchens
- Airports - Public bathrooms, general-use and maintenance areas
- Restaurants, Lodging and Retail Malls - Public bathrooms, general-use and maintenance areas
- Commercial Offices - Bathrooms, basement areas, hallways and kitchen facilities
- Public Areas - Wherever receptacles are located near wet or damp locations

Benefits

- Short circuit protection;
- Overload protection;
- Multiple protection functions
- Overcurrent protection;
- Overcharge protection;
- Anti filling protection;
- Reverse charge protection;

Advantage:

EMI Testing passed (Strong anti-interference ability);
Standby energy consumption: <50mW (90VAC~135VAC) ;
Accurate constant voltage: ($\pm 0.5\%$ @90VAC~135VAC $I_o = 4.2A$) ;
Accurate constant current: ($\pm 0.5\%$ @230VAC, $V_o = 3\sim 5V$) ;
Meet the 6 level energy efficiency requirements;

Features

Tamper-Resistant

Helps keep children safe.
Helps prevent insertion of foreign objects.
Children insert objects into the socket such as screw driver, knife or copper wire can not make the TR shutter open, unless the plug insert into with both pins.

Self-Protection Function

The USB will cut the power off once charging current exceeds its maximum value supply to protect the safety of the device you are charging, Intelligent chip control.

Weather-Resistant

Automatic shutter system prevents young children from inserting unwanted objects into the outlets. Constructed with advanced UV stabilized engineering to provide superior corrosion, temperature, and UV resistance, preventing from discoloration and aging, ideal for outdoor use.

Easy Installation

Works with 12 AWG for 20Amp Receptacle while 14 AWG for 15Amp Receptacle. The USB outlet accept side wire and back wire. All the screws have been loosened and easy of installation, people no need to loosen the screws before wiring. We provide regular wall plate as well. Replace an existing outlet in as short as 10 minutes.

Prevents line-load reversal miswire:

No power to the face outlet or downstream receptacle if wired incorrectly.

*Please Well Noted Weather-Resistant Receptacle can not instead of Water-proof Outlet.

Outlets

Residential & Commercial Grade Receptacle

Meets National Electrical Code® Requirements

Features and Benefit

- Residential - Kitchens, bathrooms, garages, basements, laundry rooms, all necessary locations power supply around the house;
- Educational Facilities - Classrooms, restrooms, laboratories, dormitories and kitchens;
- Airports - Public bathrooms, general-use and maintenance areas;
- Restaurants, Lodging and Retail Malls - Public bathrooms, general-use and maintenance areas;
- Commercial Offices - Bathrooms, basement areas, hallways and kitchen facilities;
- Public Areas - The location People can use power supply usual.

TR
Tamper
Resistant

Tamper-Resistant

- Tamper-Resistant designed cover full line of the outlets, with a variety of duplex, Decorator, and specification-grade receptacles in commercial versions and in residential versions as well.

Every year more than 2,000 children in the U.S. under the age of 10 were treated in emergency rooms for injuries related to electrical receptacles approximately seven children per day.* In most of these cases:

- The victims were younger than four years old and suffered first or second-degree burns.
- Children were injured when sticking common objects such as hairpins or keys into receptacles.
- The injuries occurred at home.

Helps keep children safe.
 Helps prevent insertion of foreign objects.
 Children insert objects into the socket such as screw driver, knife or copper wire can not make the TR shutter open, unless the plug insert into with both pins.

WR
 Weather
 Resistant

Weather-Resistant

Automatic shutter system prevents young children from inserting unwanted objects into the outlets. Constructed with advanced UV stabilized engineering to provide superior corrosion, temperature, and UV resistance, preventing from discoloration and aging, ideal for outdoor use.

*Please Well Noted Weather-Resistant Receptacle can not instead of Water-proof Outlet.

WIRING DEVICES

UL Listed Receptacles

The NEC® requires that Weather-Resistant Receptacles be installed in wet or damp locations such as porches, decks, and other outdoor locations where challenging conditions can cause premature failure due to cracked covers and corrosion. All Weather-Resistant Receptacles must meet stringent UL listing requirements Ultraviolet light exposure, Cold impact, Accelerated aging, Proper materials for current carrying parts, wire binding screws, and mounting straps to ensure superior corrosion resistance.

Installation & Wiring

Works with #12 AWG for 20Amp Receptacle while #14 AWG for 15Amp Receptacle. The outlet accepts side wire and back wire. All the screws have been loosened and easy of installation, people no need to loosen the screws before wiring. We provide regular wall plate as well. Replace an existing outlet in as short as 10 minutes.
